THE ROSE SPA

IPL - INTENSE PULSE LIGHT

The Rose Spa is now offering a new technology to remove unwanted hair on the face or body. It is a system of intense pulsed light which also works on pigmentation, age spots, thread veins (only on Face) skin rejuvenation and acne. Consultations are charged as a holding deposit of £30.00 and will last for 30 minutes. We will personalise a treatment plan which will give optimum results and deliver the best long term benefits for you.

QUESTIONS & ANSWERS

What is Intense pulse light?

IPL emits a beam of light onto the skin. This light is absorbed by the melanin in the hair and turns into heat energy. The follicle is heated to a temperature which alters the cell structure and stops hair from growing back.

Does it matter what skin type I am?

The IPL is not suitable for all skin types. Best results occur when there is plenty of target melanin in the hair. Blonde hair and grey hair cannot be treated. Neither can Black skin types, nor skin that has been exposed to the sun.

How long are the treatment times?

Treatment times vary, dependent on the body part. Here are some typical examples: Upper lip/chin 15-20 minutes, Lower legs 1 hr, Bikini/Under arm 30 minutes, Brazilian, 30 minutes.

How many Treatments will I need?

Typically you will need an average of 9-12 treatments, usually carried out 4-6-8 weekly intervals. Maintenance treatments are required twice a year.

What areas can be treated?

IPL can be used to remove hair from the bikini line, under arms, legs, stomach, back and facial areas. Areas with tattoos, sun-exposed skin and the delicate area around the eye cannot be treated.

To ensure there is no adverse reaction, a patch test is carried out during your initial IPL consultation.

Pigmentation/ age spots

These treatments are suitable if you want a more even skin tone, to reduce areas of excess freckling or target a specific age spot.

Sun spots, liver spots, freckles and other unwanted pigmentation are often associated with skin ageing and over exposure to the sun and sunbeds. Generally these age spots pose no health risk. However, they can be unsightly. Freckling and age spots are successfully lightened or removed with the intense pulsed light.

This treatment is a relatively quick and easy procedure. Age spots and freckles can be lightened or removed in as little as one to three treatment sessions. Treatment intervals of 4-6 weeks.

Thread veins

Facial thread veins or broken veins (small unsightly superficial red, purple veins around the nose or cheeks) are effectively treated with intense pulsed light in just a few quick, easy treatments. The treatment is suitable if you want to reduce overall facial redness, reduce blushing, be rid of broken veins or red spots and have clearer, fresher looking skin. Suitable for the face, neck and chest. Treatment intervals of 4-6 weeks.

Skin rejuvenation

Skin rejuvenation treatments can help with fine

lines, enlarged pores and poor skin texture. Sun damage can result in dull, rough skin. The intense pulsed light promotes collagen production and fibroblast activity. The results will leave your skin looking refreshed and healthy. Treatment intervals of 2-4 weeks.
